DETAILED ACTION

Notice to Applicant

1. This communication is in response to the Amendment filed 12/14/07. Claims 2, 14-15 and 63 have been cancelled. Claims 1, 23 and 43-62 have been amended. Claims 1, 3-13, 16-62 are pending.

Allowable Subject Matter

2. Claims 1, 3-13, 16-62 are allowed. The following is an examiner's statement of reasons for allowance and in light to Applicant's arguments.

Claims 1, 23 and 43 are directed to "a database which stores formula data, wherein said database is separate from said rule engine, wherein said formula data are configured to be modified as a function of business requirements of an insurance organization to form modified formula data; and a translator program which is operable to read said formula data from said database and transform said formula data into said formulas of said plurality of rules; wherein said translator program is configured to be modified as a function of business requirements of an insurance organization to form a modified translator program; and wherein said modified translator program is configured to read said modified formula data from said database and transform said modified formula data into a modified plurality of formulas".

The closest prior art of record, McKee et al (6,272,482) discloses managing business rules using jurisdictions.

Hammond et al (5,613,072) discloses system for funding future workers compensation losses.

However, none of the prior art cited above fairly discloses/suggests "a database which stores formula data, wherein said database is separate from said rule engine, wherein said formula data are configured to be modified as a function of business requirements of an insurance organization to form modified formula data; and a translator program which is operable to read said formula data from said database and transform said formula data into said formulas of said plurality of rules; wherein said translator program is configured to be modified as a function of business requirements of an insurance organization to form a modified translator program; and wherein said modified translator program is configured to read said modified formula data from said database and transform said modified formula data into a modified plurality of formulas".

Claims 3-13, 16-22, 24-42 and 44-62 incorporate the features of claims 1, 23 and 43 through their dependencies, and are also allowed for the same reasons given above.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
